

Indicative List of Accredited Test Houses Used by Applicants Since July 2013

The table below provides a list of the accredited test houses that have been used by customers in the applications ELEXON has received since July 2013.

This list is only intended to be used as an indication of which test houses ELEXON has, in the past, accepted test data from in relation to specific applications. It in no way constitutes a recommendation of a particular test house, or an assurance as to their ability to carry out testing in a way that will be acceptable to ELEXON for any other applications. All test data is scrutinised separately for each application, and differences in the equipment types tested may change the approach we take.
