# SOXLED

## LED replacement for LPS Lamps

Magnatech LED have designed and developed a unique direct LED replacement for the 35W, 55W, 90W, 135W and 180W SOX lamps and with similar dimensions to the original SOX bulb thus allowing for trouble-free retro-fit.

By simply removing the ballast and fitting our SOXLED bulb into the existing head you benefit from lower power consumption, long life and therefore lower maintenance costs. There is also the added advantage of a high CRI giving a much better quality of light.

The extruded aluminium heatsink ensures adequate cooling when used in enclosed fittings.
